

### Zebra® Automatic Inductor:

Mantissa's Zebra® Automatic Inductor establishes an entirely new standard of induction technology minimizing costly downtime. Through belt synchronization and acceleration, the Zebra ensures consistent placement of product onto the sorter. Mantissa's Destination™ control software with integrated Profibus network establishes inline dimensioning and positioning of product, creating *intelligent induction*. Meanwhile Mantissa's patented Quick Change™ belts eliminate the perennial headache of belt maintenance, reducing it to a mere three-minute task.

### Zebra® Strengths

- Unique cantilevered bed design allows quick change of belts, rollers and drives
- Auto tensioning prevents misadjustment, stretching and damage of belts
- Sleep mode w/ High efficiency motor/drive combination
- Modular construction allows tailoring of inductor length, width and stages to accommodate specific product
- Single and multiple tray loading
- Throughput rates from 35 - 70 items per minute
- Dynamic algorithms allow for a wider range of products that can be inducted
- Seamless integration with auxiliary processes such as scanning, weighing, dimensioning/cubing, and labeling
